<b>Index of types</b>	<b>8</b>
<b>Application guide</b>	<b>9</b>
<b>Selector guide</b>	<b>10</b>
<b>Applications</b>	<b>17</b>
<b>Capacitor questionnaire</b>	<b>20</b>
<b>General technical information</b>	<b>23</b>
1 General	23
1.1 Versions	23
1.2 Self-healing	25
1.3 Contacting	25
1.4 Impregnation	25
2 Characteristics	26
2.1 Capacitance	26
2.2 Voltages	27
2.3 Currents	29
2.4 Energy content $W_N$	30
2.5 Self-inductance $L_{\text{self}}$	30
2.6 Insulation resistance $R_{\text{is}}$ and self-discharge time constant $\tau$	30
2.7 Time and frequency	31
2.8 Capacitor losses	31
2.9 Self-heating	34
3 Operating modes	35
3.1 Continuous operation (co)	35
3.2 Intermittent operation (io)	35
3.3 Short-term operation (sto)	35
4 Safety	35
4.1 Protection against electric shock	35
4.2 Safety in case of overload and failure	35
5 Climatic stress	36
5.1 Temperature and cooling	36
5.2 Climatic category to IEC 68	37
6 Mechanical stress	37
6.1 Mechanical robustness of terminals	37
6.2 Vibration resistance	38
6.3 Shock testing	38
7 Low air pressure	38
8 Labeling of capacitors	38
9 Delivery and packing	39
