

Best Supplier Award from Springer Carrier

January 2012

## Outstanding products and service

For the first time, EPCOS do Brasil has been singled out as the best supplier to air-conditioning manufacturer Springer Carrier. The Best Supplier Award was presented for outstanding products and processes, end-to-end service and excellent value for money.

Springer Carrier is the Brazilian subsidiary of Carrier Corporation, the world's largest provider of air-conditioning, heating, and refrigeration solutions. Among others, Springer Carrier uses EPCOS Dual MotorCap™ AC capacitors in its various air-conditioning and cooling systems. These components combine two motor-run capacitors in one aluminum can for the operation of both the compressor and the fan.
