New data book for NTC Inrush Current Limiters

The new data book, "NTC Inrush Current Limiters," presents the current standard range of NTC thermistors for inrush current limiting (ICL). These ICLs are used, for example, in power supplies for single-phase electric motors under load. In addition to detailed product descriptions and dimensional drawings, the 60-page data book contains information on applications, taping, packaging and quality.

Contents

- Inrush current limiting in power supplies and inverters
- Soft starting of motors
